HW 6A - Philip Gase

Low-Fi Prototype: A low-fidelity sketch of the shopping cart page. This page was originally setup, so that users could see what was in the shopping cart, as well as have the freedom to move back to other areas of Muddy Paws Adventure Gear, including back to shopping and on to checkout. It also allows for editing the cart, which is not yet covered in the coded prototype.

Hi-Fi Prototype: This builds on the low-fi prototype by moving the design over to Figma and utilizing the common theme of the Muddy Paws Adventure Gear webage.
